

Durchnumerierung der Baumstruktur für das Element ‚outerTrackFolder‘ in der kml-Musterdatei („template_from_gpx_to_kml.kml“):

```
...
...
<Folder>                                     # outerTrackFolder
  <name>Tracks</name>                         # outerTrackFolder[0]
  <Folder>                                    # outerTrackFolder[1]
    <name>Mal_36_Tossals_Verds</name>         # outerTrackFolder[1][0]
    <Placemark>                              # outerTrackFolder[1][1]
      <name>Path</name>                      # pathPlacemark[0]
      <styleUrl>#lineStyle</styleUrl>        # pathPlacemark[1]
      <LineString>                           # pathPlacemark[2]
        <tessellate>1</tessellate>          # pathPlacemark[2][0]
        <coordinates>                       # pathPlacemark[2][1]
          2.796920,39.787254,750.00
          2.796940,39.787220,750.00
          2.796966,39.787193,751.00
          ...
          ...
          2.797023,39.787090,750.00
          2.796920,39.787254,750.00
        </coordinates>
      </LineString>
    </Placemark>
  </Folder>
</Folder>
...
...
```

Durchnumerierung der Baumstruktur für das Element ‚plmElem‘ in dem eingebetteten ‚waypointTemplate‘:

```
...
...
waypointTemplate=''
<Placemark>                                  # plmElem
  <name>*PlacemarkName*</name>              # plmElem[0]
  <styleUrl>#waypoint</styleUrl>            # plmElem[1]
  <Point>                                     # plmElem[2]
    <coordinates>*CoordinatesString*</coordinates> # plmElem[2][0]
  </Point>
</Placemark>
...
...
```
